KWM
Gutterman^{INC.}

5" and 6" Ironman Gutter Machine

- Polyurethane Drive Train
- Rollform 24 gauge steel
- Eliminates slippage from cold weather & condensation
- Eliminates the need to load coil prior to transportation (less material waste)

Run Out Stand

1 for every 20' of coil

- Quickly adjusts from 28 3/4" to 45 1/4"
- Bottom legs fold up for easy storage
- Deluxe Stands feature roller tops to easily slide machine into place

NTM
New Tech Machinery

5" Mach II Machine 6" Mach II Machine 5 & 6" Combo Mach II Machine

- Polyurethane Drive Rollers
- Stainless Steel Forming Rollers
- Push Button RUN/JOG Controls at Entry & Exit Ends
- Forward Pulling, Easy Cut Shear
- Power Interruption Safety Circuit
- Two 360° Rotatable Reel Stands with Easy Lift Reels
- Electric Motor 3/4 HP, 110 VAC, 60 Hz, 1 Phase, 11 amps
- Welded Tubular Steel Frame
- Industry's Best Warranty

BRAKE SYSTEMS

OUR PRICES CANNOT BE BEAT!
ONE OF THE LARGEST BRAKE INVENTORY IN THE COUNTRY.

Tapco **PRO14** 10'6" PORT-O-BENDER TPRO1410

- 14" (35.6 cm) throat depth with patented large inside working pockets and a 2 3/8" (6 cm) mouth opening
- Lightweight, high tech anodized alloys and computer designed die castings for strong, durable performance
- Patented "Moving Pivot Hinge", the world's most advanced hinge design, for unparalleled bending performance
- Fast, strong, positive clamping

Tapco **PRO19** 10'6" PORT-O-BENDER TPRO1910

- 19" (48.3 cm) throat depth—largest in the industry for more efficient bending
- Stores material inside bender—reduces handling and flipping of material and speeds up bending
- Lightweight, high-tech anodized alloys and computer designed die castings
- Patented "Moving Pivot Hinge" increases bending power without marring material

JUST BEND THE ULTIMATE ACCESSORY FOR YOUR BENDER

AT LEAST 35% FASTER
THAN TRADITIONAL
BENDING!

The first innovative tool that will work universally with any Van Mark and Tapco (except for the Pro 50 and Windy Special) siding brake. For a 12'6" brake a two ft extension kit and for a 14'6" brake a four ft extension kit is required to maximize the Just-Bend tool. Just-Bend is a time saving system that will allow a contractor to measure right on the brake, instead of using a tape measure. **JBUBA**

Van Mark

10'6" MARK II™ TRIMMASTER CONTRACTOR TM10

- Power Lock™ bar provides stronger clamping along the entire bending edge for crisp, clean bends without oil canning or warping
- Increased bending radius. Make 180° hem bends easier than ever.
- Make smaller "J" channels
- Make hollow core hinge extrusions for added strength

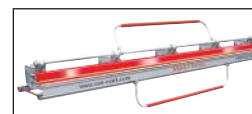

10'6" METAL MASTER® 20 CONTRACTOR MM1050

- Strongest computer engineered castings for unmatched strength
- Deepest throat available for working with wider materials
- Dual hollow-core Power Lock™ bar for better clamping force
- Increased bending radius. Make 180° hem bends easier than ever.
- Adjustable clamping jaws with the largest opening in its class
- Ergonomic heavy-duty bending handles for improved leverage

10'6" TRIM-A- BRAKE II™ T1050

- Light-weight brake loads into the truck quickly for use of multiple crews
- Requires little set-up or maintenance
- Hinge pocket helps prevent scoring damage to components
- Ridge "I" beam base rails ensure brake stays in calibration
- Full loop handle provides uniform bending along entire piece
- Material stops allow repeat bending without re-measurement
- Brake has 3/8" x 13" throat & vinyl strip for protecting material

10'6" MARK I SERIES™ M10

- Fewer parts resulting in long trouble-free service life
- No need to adjust this brake daily, or even monthly as the unique cam locking feature clamps to the thickness of the material
- Power Lock™ bar provides stronger clamping along the entire bending edge for crisp, clean bends without oil canning or warping
- Increased bending radius. Make 180° hem bends easier than ever.

TRIM-A-TABLE TAT60™ TAT60

- 6 foot Saw Boom:
Allows cuts as shallow as 2/12 pitch

Steel Legs part #3001 sold separately
Saw not included

UNISTAND™ USA1

COIL DISPENSER CD24

TRIMCUTTER™ 3017

TRIMFORMER™ 3015

SAFETY EQUIPMENT

Safety Kit Bucket

- Full body harness
- Heavy-duty 5/8" X 50 ft. blue steel polyolefin rope
- 3' soft pack lanyard with 5/8" manual rope grab
- Hinged re-usable roof peak anchor
